

RESEARCH SCIENTIST (M/F/D) BIOCHEMISTRY / BIOPHYSICS

Proteros is a privately held early-stage services provider in structure-based drug discovery with a cutting-edge discovery engine tailored to unlock even the most technically challenging targets. Proteros' work is built on scientific excellence and supports its clients to reach the right results and accelerate their overall research timelines. Proteros supports most of the world's 20 largest pharma companies and more than 250 pharmaceutical and biotech partners in the US, Europe and Japan. For more information please visit www.proteros.com.

YOUR RESPONSIBILITIES

- You will be a member of our interdisciplinary teams alongside colleagues from project management, protein production, protein crystallography, medicinal and computational chemistry
- Within these experienced teams you will be responsible for developing biochemical and biophysical approaches to support internal and customer early drug discover projects.
- You will work within our state of the art biochemistry and biophysics platform, (SPR, nanoDSF, TSA, MST, ITC and a large variety of enzymatic assays (AlphaLisa, ELISA, Abs, Lumi, FI, FP, FRET and HTRF)), instructing lab staff and performing experiments.
- You will analyze and report your results to our customers and internal project teams

YOUR PROFILE

- You have a PhD degree in biochemistry, biophysics or a comparable discipline
- You have an advanced experience with biochemical and biophysical technologies and their integration into early drug discovery programs.
- You are familiar with the drug discovery process from screen to lead and have 3+ years of relevant work experience in a drug discovery environment.
- You are able to plan experiments, generate and analyze biochemical/ biophysical data and report to drug discovery teams. You are experienced in discussing data from neighboring disciplines and to integrate your data in the context of drug discovery projects.
- Your positive, communicative and open personality helps you to understand other opinions, and contributes to productive project discussions with internal and customer project teams.
- Fluent English and basic German language skills are required.

OUR OFFER

- an innovative profession in an exciting industry
- an inspiring working atmosphere as fertile ground for your further development
- a comprehensive training that prepares you optimally for your area of responsibility
- multicultural teams and an open corporate culture
