

SENIOR PROJECT MANAGER (M/F/D) IN EARLY STAGE DRUG DISCOVERY

Proteros is a privately held early-stage services provider in structure-based drug discovery with a cutting-edge discovery engine tailored to unlock even the most technically challenging targets. Proteros' work is built on scientific excellence and supports its clients to reach the right results and accelerate their overall research timelines. Proteros supports most of the world's 20 largest pharma companies and more than 250 pharmaceutical and biotech partners in the US, Europe and Japan. For more information please visit www.proteros.com.

YOUR RESPONSIBILITIES

- Project Management of Early Drug Discovery Projects (Target to Hit ID and Lead Candidates) including customer interactions with international Pharma and Biotech companies in the US and EU, as a main contact person at Proteros, interface between customer and Proteros operations
- Setting up scientific project strategy and translation into a commercial proposal
- Lead the science and managing project teams composed of scientists from Proteins, Assays and Structural Biology departments
- Acquisition of Early Drug Discovery Projects
- Suggest suitable solutions and technological approaches according to target/customer needs
- Drive projects from gene to qualified hits according to research target profile (RTP) including mode of inhibition/action, biophysical validation and small molecule-bound protein structures

YOUR PROFILE

- Hands-on experience in industrial drug discovery, including enabling technologies in the areas of protein sciences, biophysical/biochemical assays, structural biology, and Hit identification
- Ph.D. degree in Life Sciences
- Min. of 2 years experience in pharma/biotech or CRO with a good understanding of small molecule drug discovery processes and terminologies, structure based drug discovery, proteins and protein interactions with small-molecules and nucleic acids
- Experience in Project Management in life science industry: lead project teams, interact with partners and/or customers, budget/timeline and quality control, experience working in a CRO managing customer projects is a plus
- Service and commercial mindset
- Strong analytical mind, excellent communication skills and eagerness to move projects to completion
- Able to envision a project as a whole package, anticipate problems/bottlenecks and mitigate risks

OUR OFFER

- an innovative profession in an intellectually stimulating environment
- challenging and scientifically-driven projects
- making a significant contribution to the discovery of novel and unique drugs
- leading teams of highly motivated and skilled scientists
- working with customers around the globe
- competitive salaries and bonus program
